

NEW

DB686 Q1 LED Curing Lights
Curing light and Caries detector
Efficient, lightweight

81 LED Curing Lights

2 in 1

Order code: DB686 Q1

Technical:

Adapter:	AC100-240V~50/60Hz, Output: DC5V 1.5 A
Wavelength range:	385~515nm
Optical effective area:	78.5mm ²
LED power:	10W
Lithium battery:	3.7V1400mAh

Curing Mode

Low 20s

Low temperature mode
Unique low temperature technology, comfortable curing, relieve patient discomfort.

STD 20s

Standard Mode
Can be precisely controlled according to different treatment needs.

Fast 01s

Fast mode
Ultra-high light intensity (2300~2500 mW/cm²), high-efficiency curing, 1 second curing, improving treatment efficiency.

82 LED Curing Lights

Caries Detector Mode

Caries 60s

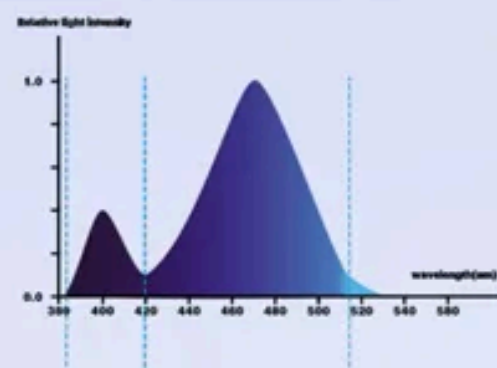

Outputs a single purple light, with a special shade, caries appear obvious orange-red.

Unique lens design
Collimated beam and uniform curing.

Optical effective area: 78.5 mm².

Wide spectrum
385nm-515nm wide spectrum curing, can cure most resins on the market.

OLED display
clear interface, simple operation.

Convenient charging
magnetic contact charging method, 360° charging at any time.

Handle design
light and sturdy, no need to feel tired when holding for a long time.
